Drive & Walkway Gates

Protect your estate with style

Your drive gate is the first thing people see when entering your estate, and it needs to be both beautiful and tough. Our drive gates are made with the same premier quality materials that are used to craft our celebrated garage doors.

CarriageDoor.com

Choose from red cedar, clear heart redwood, mahogany, aluminum, cortan, stainless steel, custom rod iron work, and a host of other inspiring materials.

Our fully customizable gates are not just beautiful, but tough as well. All drive gates are built on a frame made from 1½" by 1½" steel and is certain to stand the test of time.

Walkway Gates

Whether you're driving into your home or returning from a walk, every time there is an image of the front gate it should feel like entering another world.

Our walkway gates offer the same splendor and luxurious design as our handmade garage doors. Gates less than four feet in diameter are made from solid wood or composite materials, while gates over four feet are built around a rigid steel frame that will ensure long-lasting durability and operation. We also offer the option of installing stationary fence panels for extra wide walkways.

Match your gate to your garage door, drive gate, front door, or opt for a design that is truly unique and will capture your imagination the first time, and every time you see it.
